## *Experience*

### **Restop Serbia, 2022**

- Learned how to organize and refactor legacy code
- Fixed bugs, made adjustments to responsive design
- Made full responsive single page website using React and mui

### **Salestrekker, 2023**

- Worked successfully in a team
- Worked on a massive web app
- Implemented dark theme, took care of creative decisions
- Worked closely with the back end team on testing endpoints, enums, implementations
- Created hooks, made adjustments to the ones already written
- Created new components
- Learned about testing the edge cases, being thorough with my code
- Used many libraries, learned how to study documentation thoroughly

### **Bottletop media 2024 - current**

- Taking care of circa 400 websites
- Implementing new features, optimizing existing ones
- Making creative decisions
- Working closely with clients and support

## *About me*

I am an experienced frontend web developer, with backend experience, looking for new opportunities to grow my experience in a stimulating environment, and add value to it. I am creative, hard working, quick to learn, resourceful, and I have strong communication skills.

I enjoy doing crossword puzzles, writing poetry, and listening to Led Zeppelin.

## *Skills/Stack*

- |                |            |
|----------------|------------|
| • Html         | • .net     |
| • Css          | • C#       |
| • Javascript   | • Insomnia |
| • React        | • SQL      |
| • Tailwind css | • Git      |
| • Bootstrap    |            |
